Welcome

There is a Mary Ann Liebert at Mary Ann Liebert, Inc. and *that* makes a difference!

Dear Colleague,

I am so proud of what we have accomplished over these 35 years!

Publishing is not only my profession, but my passion. It took root in the 1960s, when I relentlessly searched the literature for a treatment, let alone a cure, for my father, who was suffering terribly from Parkinson's disease. Sadly, I never found either, but it ignited my interest in medical publishing, and I was determined to found journals that would make contributions from bench to bedside.

We established the first peer-reviewed journal on AIDS years before it was deemed a threat to public health. We continue to launch authoritative international journals in cutting-edge fields and are globally acclaimed for our extraordinary prescience in identifying critical areas of research need. Every publication is developed uniquely; there are no cookie-cutter models. Because we are a privately held company and do not have to meet stockholder expectations, we can nurture these journals individually, and also respond quickly to meet the needs of authors everywhere. Additionally we enable librarians to select the publications they need and don't penalize them by imposing costly mandates.

Our internationally renowned editors and authors are acclaimed for their expertise, and we work closely with them. Like our wonderful and highly experienced staff, they are part of the Mary Ann Liebert, Inc. family and our relationships are strong, productive, and enjoyable.

I'm very proud of this company, which bears my name, and hope you will peruse these pages and see the far-reaching scope of our enterprise. Last, but not least, I welcome your suggestions for new publications that will enrich the literature.

Yours 24/7,

mliebert@liebertpub.com

GEN (Genetic Engineering & Biotechnology News)

John Sterling

Vol 37 • 21 issues

GEN (Genetic Engineering & Biotechnology News) is the field's leading source for breaking news and analysis of the latest developments in life science R&D, from biomarker discovery through drug development, biomanufacturing, and commercialization.

Available on the fully searchable online platform:

- COUNTER 3 compliance
- Unlimited, simultaneous access
- Multiple ways of searching and cross-referencing
- Authenticated mobile access
- 21 issues per year
- Complete archival content: coverage on drug discovery, bioprocessing, OMICS, biobusiness, and translational medicine

GEN's exclusive content includes industry-standard tutorials and technical articles in bioprocessing, assays, and drug discovery; feature articles on emerging technologies; product roundups and regional biofocus articles on biotech hotbeds; as well as reports from key scientific and industry meetings.
