

Biotechnology and Regenerative Medicine Collection

The Biotechnology and Regenerative Medicine Collection from Mary Ann Liebert, Inc. delivers leading-edge content that spans both established and breakthrough areas of biotechnology and regenerative medicine to deliver innovative research and applications in gene therapy, tissue engineering, stem cell research, and drug development.

- 3D Printing and Additive Manufacturing
- Advances in Wound Care
- Applied In Vitro Toxicology
- ASSAY and Drug Development Technologies
- Biopreservation and Biobanking
- Cellular Reprogramming
- The CRISPR Journal (New in 2018)
- GEN (Genetic Engineering & Biotechnology News)
- Genetic Testing and Molecular Biomarkers
- Human Gene Therapy, Human Gene Therapy Methods, and Human Gene Therapy Clinical Development
- Industrial Biotechnology
- Nucleic Acid Therapeutics
- Rejuvenation Research
- Stem Cells and Development
- Tissue Engineering, Parts A, B, & C
