# Welcome

Dear Colleague,

As I look forward, and I am always looking forward, 2018 will be a very promising year for research and new clinical applications. Long-established disciplines are finding more translational and precision applications, and young investigators are invigorated by what the future can hold for better health and well-being.

One of the most exciting areas of endeavor is CRISPR. We have a long-standing and universally acknowledged reputation for establishing first-to-market journals in cutting-edge fields, and **The CRISPR Journal** will begin bimonthly publication in 2018. **The CRISPR Journal** will be part of a program dedicated to CRISPR and other gene editing advances – a program that will include journals, books, newsletters, webinars, and summits.

Another important new journal coming soon is **Autism in Adulthood**. To date, most research, treatment, and coping strategies are centered on young children and their families. However, the young children are growing up and present new problems, especially as health conditions from advancing age also need to be considered. This journal, under the leadership of Christina Nicolaidis, MD, MPH, will present the problems and discuss productive strategies in anticipation of these needs.

This last bit of news will surprise you. We will publish our first coffee table book, **John Wolberg: Engineer as Artist**. Dr. Wolberg's work reflects his long experience in the field of engineering coupled with a strong use of color, and designs that may remind you of Kandinsky. I have been captivated by his talent and his works of art. Dr. Wolberg has published three scholarly books previously, and I am thrilled to be publishing this book of his art.

If you did not receive a copy of the **CEO Forum**, which published an interview with me, it is also available on our website. I was delighted to be asked about what led me to begin this company and issues that are on my radar, personally and professionally. I hope you'll read it.

And always remember

**There is a Mary Ann Liebert at Mary Ann Liebert, Inc. And that makes a difference.**

Yours 24/7,
