# Welcome

Dear Colleague,

I am a positive person by nature, but there is so much uncertainty that abounds, it is tempered by realism. Still, we anticipate 2021 with energy, new publications, and additional content in our established publications that reflect our “new normal.”

Publishing has perhaps never been more important, providing new and essential information and a way to stay connected, whether in the office or remote. This has been reflected by more content submissions, a testament to the importance of our publications. And while it is impossible to predict how 2021 will evolve, I'm sure we will see less travel and more dependence on peer-reviewed journals and newsletters.

In 2021, we are introducing two new peer-reviewed journals: **Forensic Genomics**, which will address the use of DNA testing technologies and other research methods to support human identification, and **Androgens: Clinical Research and Therapeutics**, an open access journal that will explore the effects of androgens in diverse patient populations. In 2021 we will also become the publisher of **Applied Biosafety: Journal of ABSA International**, carrying forward the publication's commitment to promoting global biosafety awareness and best practices – a topic more critical now than ever.

We will also be increasing the frequency for two journals with important mandates: **Cannabis and Cannabinoid Research**, the premier peer-reviewed journal dedicated to the exploration of clinical cannabis, cannabinoids, and the endocannabinoid system, will increase from four to six issues; and **Transgender Health**, the groundbreaking peer-reviewed journal focused exclusively on the healthcare needs of transgender individuals will also increase to six issues in 2021.

My company joins me in hoping you are safe and well. And, as always, I welcome your suggestions and observations.

Warm regards and big hopes for 2021,

mliibert@liibertpub.com
